Summary

Full Stack Developer skilled in React, Node.js, MySQL, and PHP. Built and deployed Heat Haven, a full-stack e-commerce platform with authentication, cart, and payment integration. Gained backend development experience at Sobhri Technologies working on a live production system. Pursuing MCA at K.R. Mangalam University (2026).

Education

K.R. Mangalam University, MCA	Sep 2024 – Jul 2026
• GPA: 6.4	
Maharishi Dayanand University, BCA	Sep 2021 – Jun 2024
• GPA: 6.6	

Experience

Full Stack Developer Intern , Sobhri Technologies – Patel Nagar, Delhi	June 2025 – Sep 2025
• Worked on the Vows4Life project, a wedding management web platform. • Built PHP backend handling user auth, dynamic content, and admin workflows for Vows4Life. • Designed MySQL schema with role-based access controls and input validation to secure user data. • Collaborated with the development team to deliver project milestones efficiently.	
Freelance Web Developer	2024 – Present
• Architected and developed a full-stack sneaker e-commerce platform from scratch, handling both frontend and backend independently. • Built responsive UI with React and Tailwind CSS covering 10+ pages including cart, wishlist, checkout, orders, and admin panel. • Developed REST APIs in Node.js + Express for user authentication, product management, order processing, and inventory tracking. • Integrated Razorpay payment gateway and implemented JWT-based authentication with localStorage fallback for guest users.	

Projects

HEAT HAVEN | MCA Major Project

- Chose React + Tailwind CSS for frontend and Node.js + MySQL for backend to build a scalable, maintainable e-commerce architecture.
- Implemented secure database operations with role-based access, optimized queries, and structured schema for products, users, and orders.
- Deployed on Vercel with production-ready performance optimization, ensuring fast load times and smooth user experience across devices.
- Stack: React, Tailwind CSS, Node.js, Express.js, MySQL, JWT, Razorpay, Vercel.

Vows4Life Web Platform | Sobhri Technologies

- Developed the backend architecture and designed the database structure for the project, ensuring efficient data handling and secure operations.
- Built server-side functionalities and database integration to support dynamic content, user management, and application workflows.
- Tools Used: PHP, JavaScript, MySQL

NoteNest | MCA Team Project

- Contributed to a team-based note-sharing project by designing and developing the database architecture in SQL to efficiently manage user information, notes, and file storage.
- Created relational database schemas, tables, and queries to ensure structured data organization, smooth retrieval, and reliable storage operations.
- Tools Used: MySQL

AI Voice Assistant | Python School Project

- Built a Python voice assistant with speech recognition and text-to-speech for system task automation.

Leadership and Activities

- **Event Manager & Certificate of Appreciation** — MRIE-2025 International Engineering Conference, K.R. Mangalam University
- **Event Manager & Certificate of Appreciation** — Tech Fusion, K.R. Mangalam University

Technologies

- **Frontend:** React, React Native, HTML, CSS, Tailwind CSS, JavaScript
- **Backend:** Node.js, Express.js, PHP
- **Database:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Vercel, phpMyAdmin
- **Languages:** Python, C, C++
